

Serenity™ Osteospermum

Exceptional habit and uniform timing for early-season bench-run production.

"Magic" colors change as flowers fully open – a plus in consumers' eyes!

Low-energy crop produces full, mounded plants with tighter bench spacing and fewer PGRs.

All varieties feature the same excellent branching.

Well-suited to cool-season containers and landscapes: a full-season performer in coastal markets.

There is not another plant on the market with a flower color to match! Similar habit to Pink.
