

# Salvia Mystical

## Best Practices

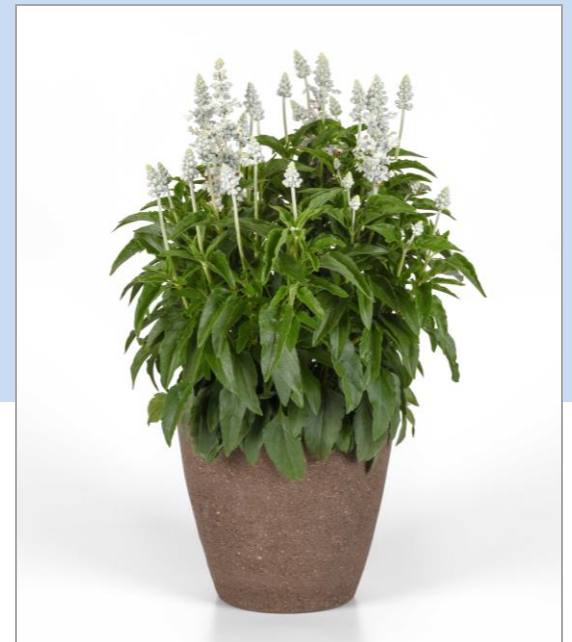

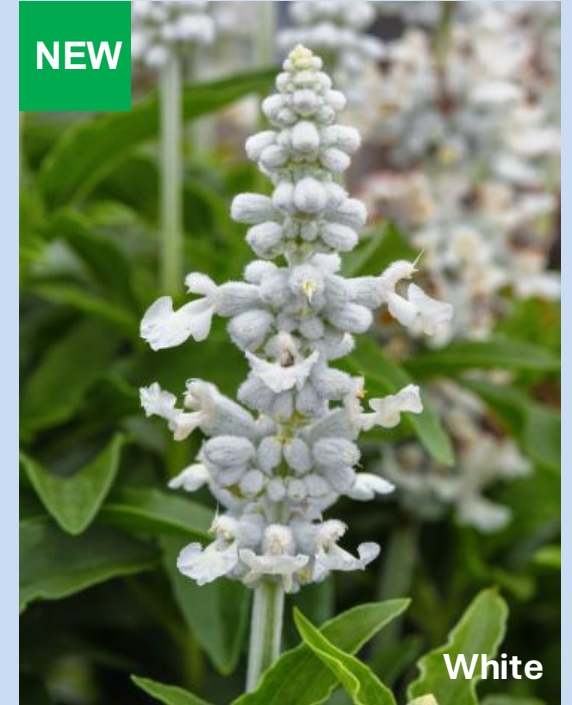

Bali FloraPlant®

# Salvia Mystical

- **NEW** compact salvia series!
- Compact, well-branched plants mean more material will arrive at retail in great condition, increasing sell-through.

# Propagation

- Rooting time: ~4 weeks
- Temperature: 70-72F
- Fungicide: Daconil
- Pinching: ~3wks after stick
- PGR: B-Nine 2000-2500ppm spray

# Finishing

- Timing:
  - 4inch to Qts: 1ppp, 4-8 weeks
  - 6inch to Gallons: 1-2ppp, 6-10 weeks
  - 10inch to 12inch: 3-4ppp, 8-12 weeks
- Temperature:
  - Day: 71-79F
  - Night: 62-67F
- PGR:
  - Toning: B-Nine 2500ppm spray
  - Holding: Bonzi 2ppm drench
  - Florel can be effective at 500ppm

2500ppm 2  
weeks after  
stick

Florel @ 500ppm  
2 weeks after  
stick  
No pinch

Florel @  
500ppm 2  
weeks after stick  
No pinch

# Key Take-Aways

- Both B-Nine at 2500ppm with a pinch OR Florel at 500ppm are equally effective in producing a nice plant
- Recommended pot size:
  - Quarts to Gallons – 1ppp
  - 10 inch – 3ppp
- Salvia Mystical can be grown like other Salvia farinacea to produce a market-ready plant
