

Spotlight On Logistics

11/3/2021

Product delivery runs smoothly with Ball FloraPlant's hard-working logistics team.

There are no secrets to the success of the Ball FloraPlant international logistics team – they prepare heavily, work hard, and learn from every experience. That's one of the reasons *Greenhouse Management* magazine featured our very own Logistics Manager **Derrick Nagle** in its November 2021 issue ([click here to read the full article](#)).

This season, Derrick, teammate **Michelle Oetjens** and their colleagues navigated a record-breaking peak shipping season for Specialty Garden, Geraniums, Poinsettias and trucked Perennials.

Going into the 2022 season, Derrick's team has the aggressive goal of further expanding our trucking program while keeping up white-glove service levels to existing customers and navigating the international freight challenges we are facing right now. He has hired a Global Logistics Analyst, **Jennifer DeLuca**, to grow our logistics team and make sure we can maintain these high service standards. We have complete confidence in Derrick and his team to navigate the 2022 peak season.

Congratulations to Derrick and the full Ball FloraPlant Logistics squad!
