

- Thrives in extreme heat and humidity.
- Uniform habit and flowering time for easy, high-density production.
- Well-branched plants ship with less breakage, tangling and shrinkage.
- Works well in quarts, gallons and mixed containers. Also great in the landscape.

Tidier habit and bigger flowers.

#### General & Information

Height: 12-14" (30-36cm) Spread: 10-12" (25-30cm) Exposure: Sun

#### Propagation Guide

Tray Sizes (cells/tray): Rooting Hormone: Average Days with Mist: Pinch: Average Propagation Time (weeks): Comments:

50, 72, 84, 105 No 7-9 Yes 3-4 Avoid stretch. Pinch 18-21 days after sticking.

#### Finishing

| Soil Light       | Temperature Day: | Temperature Night: | Fertilization (ppm N): | No. of Pinches: | Plant Growth Regulators (S) = spray / (D) = drench:                                                      | Pests:                 | Diseases:          | Comments:                                                                                                                                                                                |
|------------------|------------------|--------------------|------------------------|-----------------|----------------------------------------------------------------------------------------------------------|------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| pH: Levels       | 74-85°F          | 23-62-70°F         | (17-175-225            | 0-2             | Generally not needed. B-Nine(S) 1,500-3,000 ppm and Cycocel 750-1,000 ppm tank mix(S). Avoid Florel use. | Whitefly, caterpillars | Root rot, Botrytis | High light will significantly improve plant quality by encouraging branching, earlier flowering and the ideal plant habit growth. Best suited to mid to late Spring and Summer programs. |
