

# Honeybells

Part of the Bells Cuphea collection. Roots faster than comparable cuphea, reducing costs and production time. It can be produced at lower temperatures, decreasing the overall cost of Spring greenhouse production. Requires less special treatment because of its high resistance to Oedema.

Bursts of vibrant, hot pink flowers attract an abundance of pollinators, creating a thriving, lively garden. Its spreading habit makes it perfect for garden beds and stunning combinations. Honeybells will have your garden buzzing with beauty! *A 2019 University of Georgia Plants of Distinction award winner.*
