

Jade Bush Dipladenia

The Jade series is a part of the Diamantina™ Collection of genetics bred by mandevilla and dipladenia expert Lannes of France. These sun-loving bush varieties are earlier to bloom, plus they have increased branching and blooming capacity versus current market competitors. The series offers extreme heat, drought and bad weather tolerance. Great for patio or garden containers, without a trellis. Adaptable from quarts to large mixed containers. A truly bright white!
