Dynamo™

All the key colors. Uniform habit, timing and branching. Ships all at once. Powerful first flush of color. More continuous blooms per plant. Big, bright flowers. Crisp, medium green leaves.

Great for gardens and large containers. Available out of our state-of-the-art YecaFlora farm in Mexico, with trucking to the U.S. border.

Bright bicolor blooms with superior garden performance when compared to other medium green-leafed zonal geraniums.

Comments:

Stick immediately upon arrival. Geraniums are best rooted in media in strip form to allow for maximum airflow and avoid foliage overlap. After initial rehydration, careful misting is required to optimize callus and root initiation. Mature leaves should show slight wilting at midday and regain turgor in the late afternoon under ideal mist conditions. Leaf petiole wilting indicates undermisting. Overmisting leads to Botrytis. Remove flower buds at transplanting.
