Galaxy™

Galaxy produces mounded plants that are vigorous enough to keep their large, semi-double blooms all season in large containers and landscapes, driving higher sales at retail and creating satisfied gardeners.

The series offers excellent garden performance in an easy-to-control, vigorous greenhouse habit.

Superior garden performance when compared to other vigorous, green-leaf zonal geraniums.

Available out of our state-of-the-art YecaFlora farm in Mexico, with trucking to the U.S. border.

Features a bright, vibrant violet color with excellent branching compared to the competition.

Propagation Guide

| Tray Sizes | Rooting | Average | Pinch: | Average | Comments: |
|---------------|----------|-----------|--------|---------------|---|
| (cells/tray): | Hormone: | Days with | No | Propagation | Stick immediately upon arrival. Geraniums are best rooted in media in strip form to allow for |
| See Comments | | Mist: | | Time (weeks): | maximum airflow and avoid foliage overlap. After initial rehydration, careful misting is required |
| | | 9-12 | | 3-4 | to optimize callus and root initiation. Mature leaves should show slight wilting at midday and |
| | | | | | regain turgor in the late afternoon under ideal mist conditions. Leaf petiole wilting indicates |
| | | | | | undermisting. Overmisting leads to botrytis. Remove flower buds at transplanting. |

| Finishing | | | | | | | | | |
