## Galaxy™

Large, semi-double blooms all season in large containers and landscapes.

Easy-to-control, vigorous greenhouse habit. Superior to other vigorous, green-leaf zonal geraniums.

Available out of our state-of-the-art YecaFlora farm in Mexico, with trucking to the U.S. border.

Offers improved vigor to better match the series.

Stick immediately upon arrival. Geraniums are best rooted in media in strip form to allow for maximum airflow and avoid foliage overlap. After initial rehydration, careful misting is required to optimize callus and root initiation. Mature leaves should show slight wilting at midday and regain turgor in the late afternoon under ideal mist conditions. Leaf petiole wilting indicates

undermisting. Overmisting leads to botrytis. Remove flower buds at transplanting.

## Finishing Soil Light Temperature Temperature Fertilization **Plant Growth** Pests: Diseases: Comments: pH: Levels Day: Night: (ppm N): Pinches: Regulators (S) = Keep foliage dry. Provide Botrytis, Fungus (fc): spray / (D) = Pythium, good air circulation. Refer 65-76°F (18-24° 62-67°F (17-19° 225-300 gnats, 6.2-Xanthomonas to Galaxy Geranium culture drench: thrips. 6.6 3,500-C) aphids, recommendations at 6.000 Chlormequat chloride ballfloraplant.com. (S) 750-1,000 ppm to control growth; ethephon(S) 200-300 ppm to improve branching.
