

**Compact, dark leaf.**

- The most uniform, compact, dark-leaved zonal geranium series.
- Presto produces a strong first flush of flowers – 3 to 4 blooms.
- Naturally compact habit needs no PGRs, saving you time and money.
- Best suited to 4 to 6-in. (10 to 15-cm) pots and 10 to 14-in. (25 to 35-cm) baskets.

**General & Information**

Height:                      Spread:                      Exposure:  
 8-10" (20-25cm) 8-10" (20-25cm) Sun

**Propagation Guide**

Tray Sizes (cells/tray): See Comments	Rooting Hormone: Optional Mist:	Average Days with No Pinch: Average Propagation Time (weeks):	Pinch: Average 3-4	Comments: Stick immediately upon arrival. Geraniums are best rooted in a media in strip form to allow for maximum air flow and avoid foliage overlap. After initial rehydration, careful misting is required to optimize callus and root initiation. Mature leaves should show slight wilting at midday and regain turgor in the late afternoon under ideal mist conditions. Leaf petiole wilting indicates undermisting. Overmisting leads to Botrytis. Remove flower buds at transplanting.

**Finishing**

Soil Light pH: Levels 6.2-(fc): 6.6	Temperature Day: 65-76°F (18-24°C) Night: 62-67°F (17-19°C)	Fertilization (ppm N): 17-225-300	No. of Pinches: 0	Plant Growth Regulators (S) = spray / (D) = drench: Generally not needed. chlormequat chloride(S) 750- 1,000 ppm to control growth; Florel(S) 200-300 ppm to improve branching.	Pests: Fungus gnats, thrips, aphids, mites	Diseases: Botrytis, Pythium, Xanthomonas	Comments: Presto Geraniums usually do not require PGRs to produce high- quality plants. They are naturally compact, well-branched and early to flower.
