Fantasia[®]

Dark leaves contrast well with bright blooms. Excellent uniformity for optimum shipping density. Core and novelty colors. Great for hanging baskets. Available out of our state-of-the-art YecaFlora farm in Mexico, with trucking to the U.S. border.

Extends the line with a vibrant pink color.

Time (weeks):

gation Stick imme

Comments:

Stick immediately upon arrival. Geraniums are best rooted in media in strip form to allow for maximum airflow and avoid foliage overlap. After initial rehydration, careful misting is required to optimize callus and root initiation. Mature leaves should show slight wilting at midday and regain turgor in the late afternoon under ideal mist conditions. Leaf petiole wilting indicates undermisting. Overmisting leads to Botrytis. Remove flower buds at transplanting.

Finis	ning								
Soil pH: 6.2-6.6	Light Levels (fc): 3,500- 6,000	Temperature Day: 65-76°F (18-24° C)	Temperature Night: 62-67°F (17-19° C)	Fertilization (ppm N): 225-300	No. of Pinches: 0	Plant Growth Regulators (S) = spray / (D) = drench: Chlormequat chloride(S) 750- 1,000 ppm to control growth; ethephonS) 200- 300 ppm to improve branching.	Pests: Fungus gnats, thrips, aphids, mites	Diseases: Botrytis, Pythium, Xanthomonas	Comments: Day and night temperatures of 71 to 76°F (21 to 24°C) are ideal for the earliest stages of plant development. Fantasia Geraniums usually do not require PGRs to produce high-quality plants. Refer to the Fantasia Zonal Geranium Grower Facts at ballfloraplant.com for detailed culture information.
