

- Dark leaves offer superb contrast to bright blooms.
- Excellent uniformity for more plants per sq. ft. and optimum shipping density.
- Targeted range of core and novelty colors simplifies selection.
- Best suited to 5-in. (13-cm) and larger pots and hanging baskets.

General & Information

Height: 12-14" (30-36cm) Spread: 12-14" (30-36cm) Exposure: Sun

Propagation Guide

Tray Sizes	Rooting	Average	Pinch:	Average	Comments:
(cells/tray):	Hormone:	Days with	No	Propagation	Stick immediately upon arrival. Geraniums are best rooted in media in strip form to allow for maximum airflow and avoid foliage overlap. After initial rehydration, careful misting is required to optimize callus and root initiation. Mature leaves should show slight wilting at midday and regain turgor in the late afternoon under ideal mist conditions. Leaf petiole wilting indicates undermisting. Overmisting leads to Botrytis. Remove flower buds at transplanting.
