

# Bloomify™

# Ball FloraPlant™

The first certified sterile lantana.

Completely sterile; won't go out of flower in the heat of Summer.

Two weeks later to flower than Lucky™.

Medium-vigorous, mounded shape.

Verified plant sterility means it won't stop producing pretty white blooms all season long.

## General & Information

**Height:** 14-20" (36-51cm)   **Spread:** 12-18" (30-46cm)   **Exposure:** Sun

## Propagation Guide

| Tray Sizes<br>(cells/tray): | Rooting<br>Hormone: | Average Days with<br>Mist: | Pinch: | Average Propagation Time<br>(weeks): | Comments:  |
|-----------------------------|---------------------|----------------------------|--------|--------------------------------------|--|
| 50, 72, 84, 105             | Optional            | 7-11                       | Yes    | 4-5                                  | Stick immediately upon arrival. Apply preventative fungicide spray after sticking. |

## Finishing

| Soil<br>pH:<br>(fc): | Light<br>Levels  | Temperature<br>Day:   | Temperature<br>Night: | Fertilization<br>(ppm N): | No. of<br>Pinches: | Plant Growth<br>Regulators (S) =<br>spray / (D) = drench:  | Pests:                             | Diseases: | Comments:   |
|----------------------|------------------|-----------------------|-----------------------|---------------------------|--------------------|--|------------------------------------|-----------|---|
| 5.8-<br>6.2          | 5,000-<br>10,000 | 74-85°F (23-29°<br>C) | 62-67°F (17-19°<br>C) | 225-300                   | 1-3                | Lantana is responsive to a<br>daminozide 2,500-5,000<br>ppm and chlormequat<br>chloride 1,000-1,500 ppm<br>tank mix(S), as well as<br>ethephon(S) 300-400 ppm,<br>paclobutrazol(S) 20-40<br>ppm and uniconazole(S)<br>10-20 ppm. | Whitefly,<br>leafminers,<br>aphids | Root rot  | Allow plants to dry<br>regularly between<br>waterings. Pinch as<br>needed to shape.<br>Feeding at recommended<br>levels will promote<br>vigorous plants that will<br>continue to actively grow<br>and flower. |
