

# Shamrock™

Medium vigor.  
Well-branched, mounded habit.  
Great in a wide range of pot sizes from quarts to hanging baskets.  
Uniform across all colors.  
Excellent component for combos in the heat.  
*Greenhouse Grower, 2025 Field Trials: West Madison Ag Research Station: "Shamrock Lavender was an outstanding performer in September, filling its bed space with abundant lavender and cream-colored blooms and clean foliage. It finished the season looking fresh and full, just as many other plants began to wind down."*

## General & Information

**Height:** 12-16" (30-41cm) **Spread:** 12-14" (30-36cm) **Exposure:** Sun

## Propagation Guide

| Tray Sizes (cells/tray): | Rooting Hormone: | Average Days with Mist: | Pinch: Yes | Average Propagation Time (weeks): | Comments:                                                                          |
|--------------------------|------------------|-------------------------|------------|-----------------------------------|------------------------------------------------------------------------------------|
| 50, 72, 84, 105          | Optional         | 7-11                    |            | 4-5                               | Stick immediately upon arrival. Apply preventative fungicide spray after sticking. |

## Finishing

| Soil pH: | Light Levels (fc): | Temperature Day:  | Temperature Night: | Fertilization (ppm N): | No. of Pinches: | Plant Growth Regulators (S) = spray / (D) = drench:                                                                                                                                                                                                                                           | Pests:                      | Diseases: | Comments:                                                                                                                                                                             |
|----------|--------------------|-------------------|--------------------|------------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5.8-6.2  | 5,000-10,000       | 74-85°F (23-29°C) | 62-67°F (17-19°C)  | 225-300                | 1-3             | Lantana is responsive to a daminozide 2,500-5,000 ppm and chlormequat chloride 1,000-1,500 ppm tank mix(S), as well as ethephon(S) 300-400 ppm, paclobutrazol(S) 20-40 ppm and uniconazole-P(S) 10-20 ppm. Little Lucky should not need growth regulators due to its naturally compact habit. | Whitefly, leafminer, aphids | Root rot  | Allow plants to dry regularly between waterings. Pinch as needed to shape. Feeding at recommended levels will promote vigorous plants that will continue to actively grow and flower. |
