ColorRush™

Excellent garden performance.
Most vigorous line.
Ideal for 12-in. (30-cm) and larger containers and baskets, as well as landscapes.
Finishes 10 to 12 weeks from stick.
Bright, eye-catching colors and novelties.
Matched habits for easy production.

The most compact genetic in the series. Cold night temperatures in trial locations like California and West Chicago make the genetic more compact. Watermelon Red is just as vigorous as Blue when grown under warm night and day conditions at trial locations in Texas, Florida and North Carolina.

Paclobutrazol(D) 0.25-1.0 ppm applied as crop matures will control final height but not delay flowering or reduce flower size.	Whitefly, thrips, leafminers	Botrytis, Root rot, Tobacco Mosaic Virus	Cool temperatures and high light will reduce or eliminate any need for PGRs. Monitor regularly for high pH and possible iron deficiency. Flowering will be best as days lengthen in late Spring and Summer. Daylength of more than 14 hours will hasten flowering.
