## **CannonBall™**

Uniform habit and timing. Cold tolerance for early-Spring sales. Excellent for cold-finishing programs. Compact habit for pot-tight production. Early flowering.

All colors finish within a week of each other. Good branching without pinch or PGRs.

Bright, new color addition for the series.

No. of Pinches:

spray / (D) = drench: Daminozide(S) 1,500-2,500 ppm, applied 2-4 times, can be used to control habit early. Paclobutrazol(D) 0.25-1.0 ppm applied as crop matures will control final height but not delay flowering or reduce flower size. Daminozide applications late in the crop time can cause instability in flower color.

Cool temperatures and high light will reduce or eliminate any need for PGRs. Monitor regularly for high pH and possible iron deficiency. Flowering will be best as days lengthen in late Spring and Summer. Daylength of more than 14 hours will hasten flowering.
