SolarTower™

The first-ever self-climbing Ipomoea!
Climbs quickly; fills a large pot on a quick turn.
Use with a trellis, as a topiary or on a vertical wall planting.
Best in 1 gallon and up, with some kind of trellis.
Makes a great thriller in mixed combos, climbing up a bamboo stick.
Easy to produce; no trimming, PGRs or training to climb the trellis.

Propagation Guide

| Tray Sizes | Rooting | Average | Pinch: | Average | Comments: | |
|----------------------------------|----------------|---------------------------|----------|-------------------------------|--|--|
| (cells/tray): 50, 72, 84, 105 | Hormone: No | Days with Mist: 3-4 | Optional | Propagation Time (weeks): 3-4 | Move rooted cuttings off mist quickly to avoid stretch. Ipomoea URC do not like to be stored, so stick immediately. Cooling cuttings can actually do damage, so it is recommended that, if you do store cuttings, do not put them in a cooler, and maintain temperatures at 55-60°F (13-16°C). | |

| Finishing | | | | | | | | | | |
