

Cabaret®

Cabaret carries the best-performing lineup of solid colors and exciting bicolors with early flowering!

Most varieties flower with a 10.5-hour day length, and stay open and in flower under low light conditions – a big plus at retail.

All new genetics flower early when produced for target production weeks prior to Week 5 in the South and Week 14 in the North.

Works well in 4.5 to 6-in. (11 to 15-cm) pots up to large baskets.

Brighter color and earlier to flower than the current Rose, with early flowering, so it is great to target production for week 14 or earlier. Perfect for tight basket production.

General & Information

Height: **Spread:** **Exposure:**

6-10" (15-25cm) 10-12" (25-30cm) Sun

Propagation Guide

Tray Sizes (cells/tray):	Rooting Hormone:	Average Days with Mist:	Pinch: Yes	Average Propagation Time (weeks):	Comments:
50, 72, 84, 105	No	6-8		3-4	Avoid wide fluctuations in soil moisture. Apply preventative fungicide drench at 18-21 days after sticking.

Finishing

Soil pH:	Light Levels (fc):	Temperature Day:	Temperature Night:	Fertilization (ppm N):	No. of Pinches:	Plant Growth Regulators (S) = spray / (D) = drench:	Pests:	Diseases:	Comments:
5.4- 5.8	(fc): 5,000- 8,000	71-76°F (22-24° C)	50-58°F (10-14° C)	225-300	1-2	Use daminozide(S) 2,500-5,000 ppm, paclobutrazol(D) 3-8 ppm or ethephon(S) 300-500 ppm applied 1 time up to 3 times for large baskets to maintain habit as needed.	Thrips, aphids, leafminers	Root rot	Cooler air temperatures and high light will reduce or eliminate any need for plant growth regulators. Maintain pH at 5.2- 5.8 to optimize plant health. Crop times will be shortest as days lengthen in Spring. Apply preventative broad-spectrum fungicide drench early (7-10 days after transplant). Avoid saturated media and excessive feed levels.

Crop Time

4- to 5-inch (10- to 13-cm) Pots, Quarts : **6-inch (15-cm) Pots, Gallons:** **10- to 12-inch (25- to 30-cm) Tubs or Baskets:**

1 ppp, 6-9 weeks

1-2 ppp, 7-11 weeks

3-5 ppp, 8-12 weeks
