

# SuperCal®

The best characteristics of petunias and calibrachos, in one exceptional collection.  
Unique, vibrant colors, large blooms and high pH tolerance.  
Early-flowering varieties can be grown cool for cost-efficient production.  
Excellent heat tolerance and weather recovery.

SuperCal offers 3-color mixes that have been trialed and proven to grow well together. The components are packaged and shipped together, so you can stick them in the same container to create these sensational color combos. Garden Magic Mix contains Blue, Light Yellow and Royal Red petchoa. SUPERCAL is bred by Sakata. SUPERCAL is a registered trademark of Sakata.

## General & Information

| Height:          | Spread:          | Exposure: |
|------------------|------------------|-----------|
| 14-28" (36-71cm) | 14-32" (36-81cm) | Sun       |

## Propagation Guide

| Tray Sizes<br>(cells/tray): | Rooting<br>Hormone: | Average Days<br>with Mist: | Pinch:<br>Yes | Average Propagation<br>Time (weeks): | Comments:   |
|-----------------------------|---------------------|----------------------------|---------------|--------------------------------------|---|
| 50, 72, 84, 105             | No                  | 6-8                        |               | 3-4                                  | Avoid wide fluctuations in soil moisture. Apply preventive fungicide drench at 18-21 days after sticking. |

## Finishing

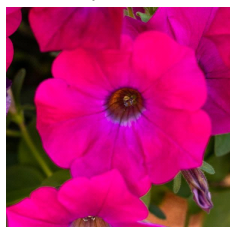

| Soil<br>pH: | Light<br>Levels<br>(fc): | Temperature<br>Day:   | Temperature<br>Night: | Fertilization<br>(ppm N): | No. of<br>Pinches: | Plant Growth Regulators<br>(S) = spray / (D) =<br>drench:   | Pests:                                      | Diseases:                                 | Comments:  |
|-------------|--------------------------|-----------------------|-----------------------|---------------------------|--------------------|---|---|---|--|
| 5.4-<br>5.9 | 5,000-<br>8,000          | 60-70°F (16-21°<br>C) | 50-58°F (10-14°<br>C) | 200-250                   | 1-2                | Foliar sprays of ancymidol 10-30 ppm or sprays of daminozide/paclobutrazol tank mix, daminozide 2,500-5,000 ppm/paclobutrazol 10-30 ppm. Drench of ancymidol 1-3 ppm, or drench of paclobutrazol 1-4 ppm. | Whitefly, thrips, leafminers, aphids, mites | Botrytis, Crown rot, Tobacco Mosaic Virus | Cool temperatures and high light reduce need for PGR. SuperCal Blue is high vigor. Artist Rose, Cherry and Neon Rose are medium vigor. |
